MOHAU KAMOHELO MOLISALIFE

Software Developer | Computer Science Graduate

Phone: 078 690 7692 | Email: molisalifemohau@gmail.com | Location: Pretoria, Gauteng

Professional Summary

Computer Science graduate with hands-on experience in software development, backend systems, database management, and web technologies. Experienced in building and testing applications using Java, Python, C#, and JavaScript. Strong analytical and problem-solving abilities with experience collaborating in development teams and participating in hackathons. Passionate about building efficient, scalable software solutions and continuously improving technical skills.

Technical Skills

Programming: C#, Java, JavaScript, Python

Web Development: HTML, CSS, REST APIs

Databases: MySQL, PostgreSQL, SQLPlus

Tools & Technologies: Git, Docker, AWS (basic hosting knowledge)

Software Development: Backend Development, API Integration

Testing: Unit Testing, Debugging, Software Testing

Methodologies: Agile, Scrum

Professional Experience

Junior Full Stack Developer – ATISA Technology (PTY)
July 2025 – March 2026

- Contributed to the development of GradPro, a web platform designed to connect recent graduates with junior job opportunities posted by businesses and institutions.
- Primarily focused on backend development using C#, building and improving server-side functionality to support job listings, application workflows, and data management.

- Collaborated with a development team using Git for version control and code collaboration.
- Assisted in building and integrating RESTful APIs to enable communication between the frontend and backend services.
- Utilized Docker for containerization and environment consistency during development and deployment.
- Supported the deployment and hosting of the system on Amazon Web Services (AWS).
- Performed API testing and debugging using Postman to ensure reliability and correct functionality.
- Participated in team discussions and contributed to improving system features that allow graduates to discover and apply for entry-level opportunities.

Software Developer Intern – Spacebar Solutions

July 2024 – August 2025

- Developed and tested software applications including a Visual Assistant Referee (VAR) system using Python and web technologies.
- Built backend functionality using Java to improve application performance and reliability.
- Assisted in designing and managing databases for application data storage.
- Developed and integrated APIs to enable data exchange between system components.
- Collaborated with developers to debug, troubleshoot, and improve application performance.
- Performed unit testing and contributed to technical documentation.

Marketing Assistant – Micah Terrace

January 2022 – March 2025

- Promoted company services through online and offline marketing campaigns.
- Conducted market research to support sales and marketing strategies.
- Engaged with potential clients and provided product support.
- Assisted in planning and executing promotional campaigns.

Projects & Competitions

- Tshwane Varsity Hackathon – Collaborated with a team to develop innovative software solutions under time constraints.

- GKHack23 – Participated in competitive programming challenges and problem-solving tasks.
- Visual Assistant Referee (VAR) Project – Contributed to development, testing, and documentation of a sports video analysis system.

Education

Diploma in Computer Science – Tshwane University of Technology (2021 – 2024)

National Senior Certificate (Matric) – Matlhaleng Secondary School (2020)

Certifications

- Data Structures & Algorithms
- Full-Stack Development
- Business Analysis & Modelling
- Information Security
- Agile & Scrum Methodologies

Languages

- English
- Sesotho
- Setswana
- isiZulu
- Xitsonga
- Sepedi
